

# Embrace the Climb.

Pursue Continuous  
Compliance  
for Your Federal  
IT Systems

Drive Continuous Compliance | Accelerate ATO | Reduce Manual Documentation

## Experience Confidence in Your Federal IT Systems

DRT Confidence is the next generation Governance and Risk Compliance (GRC) solution to help agencies transition to OSCAL and continuous compliance.

## Authority to Operate (ATO) Process Innovations Have Finally Arrived

Today's security compliance processes cannot survive the current state of time consuming, manual documentation and assessment.

With National Institute of Standards and Technology's (NIST) Open Security Controls Assessment Language (OSCAL), you can now facilitate automation and position your IT infrastructure for continuous compliance.

FedRAMP is accepting accreditation packages in OSCAL today! With DRT Confidence, agencies are now empowered to develop their system security plans (SSP) and assessments in OSCAL.

### CIOs and CISOs can now:

- Position for continuous compliance on IT systems that leverage DevOps
- Reduce ATO documentation burden, reusing existing accreditations
- Accelerate ATO approval for IT systems that leverage agency approved guidelines
- Provide Business Stakeholders accurate and timely views on the security accreditation process
- Begin the ATO process early during IT systems development – “Shift Left”
- Integrate security compliance workflow within IT Systems

## See What's Possible

### Schedule a Demo

To see the value of DRT Confidence and continuous compliance, schedule a demo with **Valinder Mangat, Chief Innovation Officer, DRT** at [vmangat@drstrategies.com](mailto:vmangat@drstrategies.com).
